### [PDF] Chapter 1 Introduction To Fluid Mechanics

6 chapter 1 "introduction to fluid mechanics by deformation. in fluid mechanics, pressure is usually the most important type of compressive stress, and will shortly be discussed in more detail. 2. the second type of stress, shown in fig. 1.3(b), acts tangentially to the surface; it is called a shear stress  $\tau$ , and equals  $f/a$ , where  $f$  is the tangential force and  $a$  is the area on which it acts.
